

**REMARKS**

In order to advance prosecution, applicant cancels the prior claims and submits claim 41 and 42 now in strict process form as indirectly suggested by the examiner, rather than relying on the previously claimed instruction sheet for specifying the process steps to be carried out by the user of the eye patch.

The cited references have been reviewed and it is respectfully submitted that the two newly submitted claims patentably distinguish over the cited references.

The examiner is respectfully requested to reread the remarks in the prior response that apply in like manner to the proposed claims 41 and 42. Regarding new results supporting patentability: the eye patch enhances socializing (its attention getting message) during vigorous exercises like swimming or dancing without the possible loss of regular eyeglasses that also have a stigma for some people. Also, claim 42 creates a new use of an old otherwise discarded corrective eyeglass lens.

Respectfully submitted,

Robert Nathans  
Reg. #19,558
